Objective: To have a work environment that is challenging but welcoming.

Experience: I worked in a professional kitchen for over a year total. I started out as a dishwasher in a French Bakery called the “Adorable French Bakery.” I got promoted after three months then I started to work as a pastry chef. I worked as a pastry chef most of this summer. As a pastry chef, I met a lot of cool people and learned so much about working in a kitchen. I learned that twice the hands, really is half the work. I have also worked at Farmers Markets as a vendor for the same French Bakery so I have experience dealing with customers and people on the job. I love talking to people and getting to know so I enjoy interacting with them. This Summer I also worked as maintenance at a boarding school in Tahoe called Squaw Valley Academy. On the job I would help fix things like holes and I learned about mulching and why you would want to cover certain areas with wood chips.

Education: Currently a Computer Science major at Oregon State Cascades. Graduated from Squaw Valley Academy with a 4.0 GPA after spending most of high school at Santa Cruz High School. In High School I got a 4 on the AP tests: calculus BC and French. I also took AP physics 1 and 2, it was a really good learning experience and got me interested more in classes that would actually help me outside of class. I took a summer class on programming video games at UCSC; this class got me excited for college and got me into Computer Science. **Related Skills:** Git, HTML, Basic Javascript, Microsoft Office, Google docs, Gamemaker, Bootstrap, VS code, Final Cut Pro, (categorize by familiarity)

Related Courses: Video Game Programming at UCSC, AP Calculus BC, AP Physics 1& 2,

Related Experience/Projects: Helped make a submarine for Embari that went 200 meters deep.

About Me: My name is Lucas rouchy I am 17 years old; I'm a first year at Oregon State Cascades. I'm from Santa Cruz, California but I graduated from high school at Squaw Valley Academy. I am a first generation American my family is French and I am also a French citizen. I love skiing, camping, and nature. I've been skiing since I was 8 years old and everytime I go I still get as excited. I love being in the mountains because it is humbling. I also play soccer with my friends. Although, I don't play on a team anymore I will always cheer for my teams. One thing that changed my life was when I backpacked across the Utah desert in the middle of winter. I learned leadership skills: leading hikes, teaching others how to make fire, and as well as making decisions for the good of the group. While we were out there we carried all of our belongings with us and hiked over 300 miles in the snow.

Additional Skills: Fluent in French
